- Project Management
- Critical Thinking

PROFESSIONAL EXPERIENCE

Shopify developer (Contract) | TPS Digital Services | Quebec, Canada (Remotely)   **March 2025 - Present**

- Providing ongoing Shopify development services, including custom theme development, front-end customization, responsive design integration, and performance optimization.
- Successfully contributed to developing the Zapp Télé e-commerce project, with additional projects scheduled.
- Collaborating closely with internal teams to deliver scalable, high-performing, visually engaging Shopify solutions.

Freelance Shopify Developer | Upwork Inc. and Fiverr   **July 2021 - Present**

- Achieved Upwork Top-Rated badge, reflecting the commitment to delivering high-quality solutions and client satisfaction.
- Collaborated with clients to understand their needs and provide tailored Shopify solutions, including custom theme development, app integration, and website optimization. Maintained strong client relationships through effective communication and timely delivery of projects.

PROJECTS

1. Zapptele - Developing full Shopify websites from Figma files.   Live website: zapptele.myshopify.com

I translated design mockups from Figma into fully functional Shopify websites.

Key contributions:

Custom theme development, ensuring seamless integration of design and functionality, aligning Zapptele's brand identity, and meeting specific business requirements.

2. Maitha and Treats - Custom Theme Development / speed optimization: Live website: maithaandtreats.com

I developed the Maitha and Treats Shopify website, focusing on enhancing user experience and site performance.

Key contributions: page development, custom mega menu implementation, speed optimization and marketing/loyalty app integration (Klaviyo, Royalty).

3. Ralraw - Website Development and Bug Fixing: Live website: ralraw.com

Developed and enhanced the Ralraw Shopify website, focusing on improving functionality and user experience.

Key contributions:

Product and collection page development, bug fixing, and ensuring responsive design.
